

Skills

Business Intelligence Tools	: Advanced Excel (MS 2013), PowerBI, R Programming(3.4.4), SPSS (21), Python
Data Analysis & Modelling	: DAX, Power Query, ETL, Data Warehousing
Data Analysis & Modelling	: VBA (Intermediate), DAX (Intermediate), C# (Intermediate), C++ (Beginner)
Statistical Skills	: Statistical modelling, Designs of Experiments (DOE), Multivariate data analysis, Quality control tools, Operational research, Regression Analysis, Generalized Linear Model, Decision Trees

Work Experience

Power BI Analyst (A. J. Hospital & Research Centre)

(2024 To Jun-25)

- Developed interactive Power BI dashboards and reports to visualize key business metrics, improving decision-making efficiency
- Optimized data models and DAX calculations, reducing report load time by 50%.
- Integrated multiple data sources, including SQL Server, Excel, and cloud-based platforms, to create centralized reporting solutions.
- Conducted data analysis and provided insights that led to 20% improvement in operational efficiency.
- Collaborated with business teams to identify reporting needs and provided training on Power BI best practices.
- Presented data-driven insights to senior management, leading to strategic changes in business.

Statistician (A. J. Hospital & Research Centre)

(Nov -15 To Dec-23)

- Define and document all active and inactive channels for data collection, investigating the possibilities of linking fields, merging tables and archiving legacy information in compressed formats
- Develop analysis schemas that include textual and visual components to model what to expect from a particular plan of action
- Independently applies logic to set up cohort based on data plan as provided
- Fitted a regression model for waiting time in emergency department using a regression analysis
- Wrote R programs and SAS programs for automation of statistical analysis which increased the hospital productivity
- Provided statistical analysis earlier than expected which helped delayed projects get back on time
- Develop programs to perform data validation and error detection to ensure data integrity
- Learns and applies new statistical theory and techniques for ongoing projects or proposals
- Supported various investigations by providing statistical analysis which is the key in decision making.
- Work with the study team and PhD statisticians to develop reporting plans and generate reports on study progress
- Summarized, interpreted and presented results from research projects of Doctors, Management students, Post- Graduates & Interns
- Performed data quality checks on the input data and provided professional analyzed data
- Provided detailed interpretation of data and recommendations to optimize the future practice

Education

Master Of Science (Statistics)

2015

Mangalore University
